

75% - 80% LESS ENERGY CONSUMPTION THAN AODD PUMP

Handling Slurries and Abrasive Fluids made economical

The Cognito Electrically Operated Double Diaphragm (EODD) Pump is a product developed with customer centric approach to solve critical problems in pumping applications. Cognito EODD is engineered with a robust mechanism to meet all customer needs of low energy consumption and improved flow rate while smooth handling of abrasive fluids & slurries.

INDUSTRIES WE SERVE

CERAMICS TILES

SANITARY-WARE

WASTEWATER

MINING

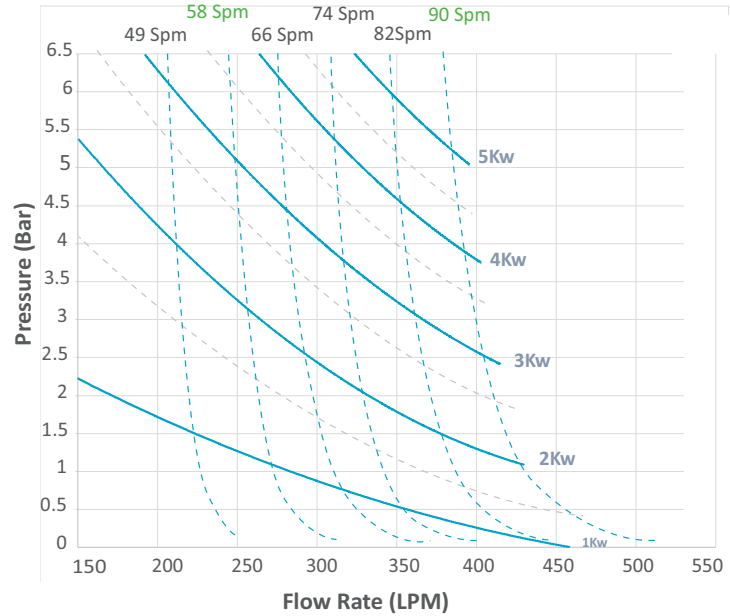

CHEMICALS

COGNITO EODD SPECIFICATIONS

PERFORMANCE PARAMETERS	MEASURES
Operations	Electro _ Mechanical (No Air)
Max FLOW / Max Pressure	510 LPM / 6 bar
Max Suction Lift	Wet Conditions - 8.5 m+ Dry Conditions - 5.5 m+
Maximum Viscosity	5,000 Cp
Material of Construction	Aluminium
Motor & Gear Box	5 hp, 7.5 hp, 10 hp
Sound Level	<79 db

PERFORMANCE CURVE

IDEX INDIA

IDEX India is a 100% subsidiary of IDEX Corporation, a global manufacturer of industrial products & technologies and committed to making trusted solutions that improve lives. We have 30 years of experience in design and development of process equipment like pumps, valves, flowmeters, compressors, pharmaceutical machines & equipment. Serving our customers is at the heart of what we do and is our number one priority.

Our organization always keeps customers in the nucleus of our innovations and their continued motivation allows us to challenge the status quo.

COGNITO

Cognito EODD pump is designed and developed in partnership with customers to help them with their critical pumping needs and meets future demand. With products & services helping solve critical problems like energy efficiency and high performance, Cognito stands by its core principle of being a smart, sustainable and dependable solution for any plant operations.

It is with this philosophy that we strive to design and develop products, helping customers safely and efficiently meet their goals.
